Jeremy Brown is Director of the Office of Emergency Care Research at the National Institutes of Health. He trained as an emergency physician in Boston, and before joining the NIH he worked in the Department of Emergency Medicine at the George Washington University in Washington DC, where he was also the research director for the department.

While at GW he founded the ED HIV screening program and was the recipient of three NIH grants which focused on a new therapy for renal colic.

He is the author of over thirty peer reviewed papers and three books, including two textbooks of emergency medicine, all published by Oxford University Press.
