Dr. Lynne D. Richardson is Professor of Emergency Medicine, Professor of Health Evidence & Policy, and Vice Chair for Academic, Research and Community Programs of the Department of Emergency Medicine at the Mount Sinai School of Medicine in New York City. A native New Yorker, she holds Bachelor’s degrees from the Massachusetts Institute of Technology (MIT) in Life Sciences and Management; and an MD degree from the Albert Einstein College of Medicine. Dr. Richardson is a nationally recognized health services researcher; her areas of interest are access and barriers to care, emergency department crowding, and healthcare disparities. She is currently Principal Investigator for “Community VOICES”, an NIH-funded study which is seeking to develop effective methods for communicating with communities about emergency research. She is also Project Director of the CEREDI program – an NIH funded initiative to use comparative effectiveness research to eliminate health disparities. Dr. Richardson, who has a strong track record of mentoring young investigators to successful academic careers, was recently awarded a K12 Research Career Development Program in Emergency Medicine, one of the first in the country. In July of 2012 she received a Health Care Innovation Award from the Centers for Medicare and Medicaid to implement a new model of emergency care for older adults. For the past eight years she has served on the New York City Board of Health and was recently appointed to the Advisory Committee to the Director of the Centers for Disease Control (CDC).
